

CABLE CAR

Decorate both sides of the cable car with your Crayons, markers, or colored pencils. Cut out each car and glue it to the sides of a clean, recycled milk carton. Make sure both pictures face up

when the milk carton is on its side. Cut holes in the front and back of the cable car, near the roof. Tie one end of the string to a chair or doorknob. Hold the other end of the string and raise and lower it to watch the cable car slide back and forth!
