

Cut out the Passenger Car. Using a craft knife, cut out the white indicated area on the bottom of the train car piece. Using the dotted lines as a guide, make all of the indicated folds (five) away from you. Next, fold the seven gray tabs away from you. Starting with the roof of the Passenger Car, glue the gray tabs to the sides of the train car. Your Car will begin to take a rectangular 3-D shape. Glue the tabs at the bottom of the car last. Your passenger Car is now complete.
